*18th Annual Angus
Bull Sale*

Friday, FEBRUARY 3, 2006

Ogallala, Nebraska

WELCOME FRIENDS, to the Martin Ranch 18th Annual Bull Sale. This year's offering is one of the most strongest powerful set of bull's we have offered. I feel the quality and consistency of our program get's deeper each year.

This is accomplished by staying focused on what I want our bull's to look like and their genetic make up and their ability to pass these genetics on to your calf crop. Quality and consistency is accomplished by using a small nucleus of High Accuracy Balance Trait Herd Bulls that are at the top of the Angus Breed for not only their EPD's but their eye appeal and ability to pass their genetics to the next generation. Please take time to study the power in the Herd Bull Battery we use.

Out of the seven main bull's we used, five are in the top 10% of the Angus Breed for Weaning Weight EPD, six are in the top 10% for Yearling Weight EPD, one is in the top 10% for Scrotal Circumference, three are in the top 10% for Milk EPD, six are positive for IMF EPD, three are in the top 10% for REA EPD, two are in the top 10% for \$W, six are in the top 10% for \$F and four are in the top 10% for \$B.

In 2005 and 2003 Martin Ranch was awarded Angus America Seedstock Producer of the Year. This award goes to the breeder whose genetics have produced the highest average premium per head on cattle marketed through Angus America.

Bull's have been conditioned on a bull growing ration. NO CREEP FEED. We do not creep feed. I believe fertility, soundness and a bull's ability to hold up through the breeding season is critical. Bull's that are fed too hard too long have trouble accomplishing this. I also believe evaluating the mother's maternal value is very important. She need's to calve, rebreed and maintain condition while raising a calf. The older more aggressive calves control the creep feeder's, therefore not allowing a true evaluation of a calf's performance or dam's ability to prove her contribution on her own.

We would like to invite you to our ranch before the sale and look over the bulls and their mothers so we can help you with your needs. Please take time to look over the information on the next page. We offer Free Feed, Free Delivery, 1st Breeding Season Guarantee and Volume Discounts.

Updated yearling weights and EPD's, scrotal measurements and ultrasound data will be available sale day.

This is a family business and Kristy, Tanner, Ty and I would like to thank God for all of the Blessings he has given us. Tanner has graduated from high school and is now taking Ag Business at NCTA. I want to thank Tanner for helping me take bull pictures this year and the work he has done on the computer getting them ready for the printer. Ty is a sophomore this year and enjoys hunting every chance he gets. This past fall he got a really nice 5 x 5 mule deer.

We would like to thank you our valued customer's, we enjoy your friendship in the cattle business. Kristy, Tanner, Ty and I would be honored to have you as our "guest" sale day. If you have any questions about the bull's, don't hesitate to call. Be sure to join us for lunch!

TJ, Kristy, Tanner and Ty

Martin Ranch 2005 & 2003 **ANGUS AMERICA™**
Seedstock Producer of the Year

This award is given to the Seedstock Producer which has the highest premium per head on cattle marketed through Angus America.

Angus America has the following services and partners available to assist you:

- Approved Seedstock Producers
- Feeder Calf Listings
- Approved Feedyards
- Grid Marketing
- Carcass Data Collection
- Data Management Assistance

We purchased Hummer at the 2004 Schurrtop spring sale. We were impressed with Hummer's thickness, wide base, raw muscle, outstanding performance, scan data and great numbers. Hummer had a BW of 83 lbs, Adj 205 of 754 lbs, Adj 365 of 1485 lbs, ADG of 5.87, Scrotal of 39.5, IMF of 4.02 and a REA of 17.2. Hummer's dam has ratios of 4-113 WW, 1-119 YW, 3-124 IMF, 3-117 REA and 3-91 Fat. Dam, Grandam and Great Grandam are all pathfinder's. For young sires in the Angus breed, Hummer is in the top 3% for WW, the top 1% for YW, the top 1% for REA, the top 1% for (\$F) and the top 5% for (\$B).

You'll like the thickness and muscle in the Alliance son going back to 216 LTD and our Primrose cow family. A good balance set of EPD's. Dam is 5 @ 93 BW ratio, 5 @ 100 WW ratio and 3 @ 103 YW ratio.

WE DO NOT CREEP FEED

Bull's have been conditioned on a bull growing ration NO CREEP FEED. We do not creep feed. I believe fertility, soundness and a bull's ability to hold up through the breeding season is critical. Bull's that are fed too hard too long have trouble accomplishing this. I also believe evaluating the mother's maternal value is very important. She needs to calve, rebreed and maintain condition while raising a calf. The older more aggressive calves control the creep feeder's, therefore not allowing a true evaluation of a calf's performance or dam's ability to prove her contribution on her own.
